OY4C exists to close the global climate education gap by delivering free, youth-led, and action-oriented climate learning to young people everywhere

Messages From Our Senior Leadership Team

It has been a great pleasure to lead a team of 30+ youth volunteers (in the Community Function) from 15 countries, each bringing their unique skills to strengthen community engagement in global climate education. In 2026, we will continue advancing our initiatives to empower student leadership and ensure that OY4C becomes a welcoming home for every learner and educator in climate education.

Deanna Gracia, Director of Community
(Since Oct 2025)

Alexandra Krištofovičová, Director of Curriculum
(Since May 2024)

2025 was marked by change in the Curriculum Function - we experienced a switch in leadership, created two new teams, developed an entirely new topic (on the ocean!) and refined internal systems. Together, over 25 of us researched, built, tested, and improved the experience for those working to increase the climate literacy of a generation, inside and outside formal education. Now we're onto our most exciting project yet - for the first time, we are bringing climate workshops directly into classrooms around the world.

Messages From Our Senior Leadership Team

2025 was a significant year of growth for the partnerships function. This was the first full year the Partnerships Function had a team of dedicated volunteers, which expanded and diversified our range of partnerships projects. Internally, that meant dedicating time to building systems unique to our function, which is inherently intersectional.

Aana Shenai, Director of Partnerships
(Since Sept 2022)

Queen (Elizabeth) Chukwu, Director of Media
(Since July 2025)

2025 was a year of growth and grounding. Stepping into the media function came with immediate momentum as I was met with a team full of passion, ideas, a deep care for the work we do, which made early brainstorming and strategy-setting feel both energising and purposeful. Over the year, we focused on building systems that could sustainably hold that energy, making it easier for our creativity to translate into meaningful impact. There were bumps on the way, but these obstacles were instrumental in showing how resilient and adaptable OY4C's volunteers are.

1. Our Story (for Now)

Who are We

The Challenge

Nearly half of national curricula worldwide **fail to meaningfully** address climate change, leaving a generation of young people without the knowledge or agency to **inherit the crisis.**

Our Solution

We deliver free, action-oriented **climate learning** where **young people already are:**

In Classrooms: the OY4CCurriculum and CCiC workshops, designed to be practical, engaging, and teacher-friendly

Online: daily, digestible climate education that reaches young people globally through storytelling and community

Who are We

Why Youth Matter

Young people aren't just beneficiaries. We are the **educators, creators, researchers, and leaders** shaping what climate education looks like. **Youth-led design ensures relevance, cultural awareness, and language that connects.**

Who we Serve:

We prioritise schools and students with limited access to climate education, **centering equity, global inclusion, and accessibility as we expand.** We also approach privileged communities, as they need to rework their systems and habits.

Combined, **our mission** is a **generation of young people equipped to inherit and address the climate crisis.**

Ailin, Head of Content

Theory of Change

Our theory of change is simple:

knowledge is foundational to systemic change.

Inputs

Inputs

- Youth leadership and resilience
- Global experiences and perspectives

Our Activities

- Scale our free, fully-developed OY4CCurriculum
- Equip young volunteers with range of skills
- Support all teachers
- Digestible and daily climate education for online learners

Outcomes

Short Term

- Empowered youth and mitigated eco-anxiety
- Improve local climate literacy

Long Term

- Communities adopt sustained climate learning
- Globally and locally informed education
- Scaled the climate change education demand
- Teachers confident in climate education delivery

Vision

An entire generation equipped with climate change education

2. Our Actions

OY4CCurriculum

The **OY4CCurriculum** is a unique, interdisciplinary climate education resource that equips young people with the foundational knowledge needed to **understand and act on the climate crisis defining our generation**.

Built across 13 topics, the curriculum is created **by youth, for youth**, and explores climate change through social justice and environmental science lenses. Each topic includes real examples of young people taking action and concludes with a practical individual or collective activity, helping **students move beyond eco-anxiety toward meaningful impact.**

As a **youth-led organisation, OY4C centres young people as active participants** in their own education. Students are encouraged to take ownership, building confidence, capability, and resilience along the way. The curriculum **remains free**, because access to quality climate education is essential.

Building on this foundation, **OY4C is now launching its next phase**: bringing in-person climate **workshops directly into classrooms around the world**, combining scalable resources with the power of face-to-face learning.

Media x Impact

Social media is one of the most scalable and accessible ways to engage young people globally on climate justice and action. Through Instagram and TikTok, OY4C uses digital storytelling to inform, connect, and **mobilise youth in formats that are familiar and participatory.**

By 2025, OY4C had built a **highly engaged online community**, reaching **14.2k followers** on Instagram and **67.6k on TikTok**. Strong performance is not pursued for virality alone, but as a signal that our messaging is clear, relevant, and valuable. Our data shows that audiences actively engage with our content by saving and sharing posts, allowing our education and campaigns to reach far beyond our immediate network and reinforcing our focus on purposeful, practical storytelling.

Instagram

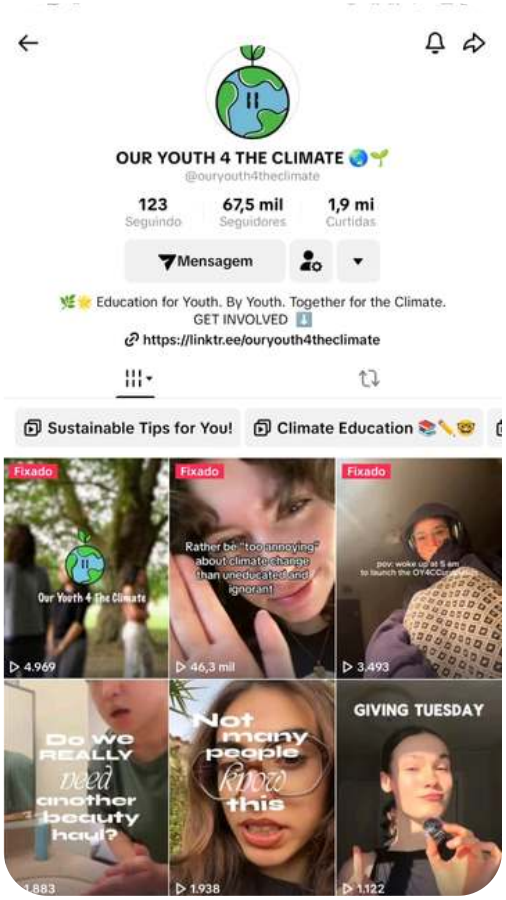

Followers	14.2K	
Engagement Rate	6%	
Avg Reach	45K	
Audience	82.9%	FEMALE
	17.1%	MALE

Our top-performing post of both the quarter and the year, covering external event activity at COP30, received approximately 23,000 views. This demonstrates the strong appetite for timely, externally focused climate content. Subsequent posts consistently averaged

8.5K
VIEWS PER POST

TikTok

OY4C's TikTok has been a key driver of **scale and discovery.**

In 2025, our content reached **1.6 million views,** generating **253,000 likes**, **16,000 comments**, and **6,000 shares**. Most traffic came from the For You Page and search, showing both strong algorithmic reach and intentional discovery of OY4C as a trusted climate education source.

History of OY4C: Turning Fear into Impact

how we started !

Our Youth 4 The Climate (OY4C) was born in **2021** as a result of many young people feeling fear, uncertainty, and frustration about climate change. With limited climate change education available in schools and rising anxiety among youth, our founder, Ava Langridge, launched a small online learning space over Zoom.

The goal was simple, but powerful: **help young people understand the world around them and turn their fears into informed action**. What began as a virtual classroom soon became a global youth-led movement.

Education, dialogue, and hope became the foundation of OY4C; a community and outlet designed to equip young people with the climate knowledge, confidence, and collective strength they need to respond to the crisis. Today, **OY4C continues to empower youth** through accessible climate education and meaningful opportunities to lead.

Impact and How OY4C Empowers Volunteers

OY4C is a global, youth-led organisation where young people find purpose, agency, and a space to feel empowered. **With over 125 volunteers worldwide**, OY4C has built an inclusive and collaborative community where youth contribute their creativity, skills, and lived experiences toward real climate impact.

Volunteers come from diverse backgrounds and are supported to explore how their **unique strengths intersect** with climate action. Through varied actions, including co-creating curriculum, campaigns, research, and media, they develop leadership, confidence, and practical skills that extend into their schools, institutions, and local communities.

OY4C Volunteers

I've always been passionate about scientific communication, making knowledge accessible to all and **OY4C gave me just the place to do that**. Meeting **people from all over the worl**d, with such valuable inputs in how to make the world a better place is and will **always be inspiring**.

Kerollayn
Content Creator & Head of Design

I've been part of OY4C for a little over a year now and my experience here has been **so inspiring.** I've seen **OY4C bloom, grow and change** to improve, which fills me with i**mmense adoration and pride for what we are building all together**. It's been amazing to see so many people from very different backgrounds **work all together for the same purpose** and I can't wait to see all what we can accomplish together.

Martina
Head of Video

Joining OY4C has given me the **opportunity to connect, collaborate, and learn alongside a diverse group of passionate climate advocates**. As Volunteer Coordinator, I work closely with members across different functions within the organization, and it continually inspires me to see **young people from all backgrounds coming together in harmony for the planet, united** in addressing a crisis inherited from previous generations.

Thabiso
Volunteer Coordinator

Partnerships

Why do we partner?

1. **Scale our network and impact**
   Partnerships help us build a network and community. They also ensure we avoid working in silos on similar goals.

2. **Demonstrate our position as thought-leaders**
   As the only global, youth-led climate education organization out there, we want to help lead the movement.

3. **Demonstrate the intersectionality of climate change education**
   Fixing the gap in climate change education is not just a climate issue. We are always open to partnering outside of just the climate space.

2025 Case Study

OY4C did a **social media collaboration with FGA** centered around the recent changes to the United States Environmental Protection Agency. This **educational partnership** aimed to demystify what the federal administration is changing in terms of concrete environmental policy as well as the broader implications of those changes.

Overview of Financial Status

In Q3 2025, OY4C became a **fiscally sponsored project under Climate 2025 (Host)**, a UK-based project host supporting early-stage climate initiatives. This partnership strengthens our governance, financial management, and ability to receive tax-deductible donations internationally.

host
ally for action

Why are we fundraising?

Climate education is **widely demanded but massively underfunded*.** OY4C is fundraising to:

- deliver **free** CCiC workshops worldwide,
- scale and update the OY4CCurriculum,
- rebuild our operational systems (data, M&E, infrastructure)
- and justly support full-time leadership in 2026!

* Learn more here!!

Where are we now?

- **Funds raised in 2025**: **$6.5k**
  - OY4C won a Social Shifters grant :
- **# of Donors: 54** (Avg donation: ~$70)
- **Major funding source:** crowdfunding, grants, & community

FitchGroup | Social Shifters | Global Innovation Challenge 2025
Providing Universal Access To Quality Education

2026 Goal

Raise **$500k+** to support educational scale and leadership

3. What Now?

Where we're headed?

Around the world!

Introducing...

Climate Curriculum into Classrooms (CCiC)

BUILT BY YOUNG PEOPLE

OY4CWorkshop

FOR YOUNG PEOPLE

Fashion Industry

Its impact and how you can help !

CCiC brings OY4C's youth-led climate education directly into schools through free, hands-on workshops worldwide.

Why CCiC Matters?

- High-touch model
- Opportunity for hands on community building
- Teachers, students, and schools become long-term partners
- Schools become hubs that spread climate learning locally
- Facilitate entry point for full curriculum integration

Our Goals for 2026

1. Deliver CCiC workshops in 50+ schools across 3+ continents
2. Develop regional CCiC partnerships and improve how our resources are informed
3. Publish case studies
4. Build a global and engaged network of schools

Scale with Us!

Take Action Today!

1. Integrate the OY4CCurriculum FOR FREE

Bring youth-led climate education directly into your school or organisation

2. Bring CCiC Workshops to Your School

Invite our facilitators to deliver a free, action-oriented introduction to climate literacy

3. Support Our Growth

Fund a school, fund a region, or support youth-led climate education globally

"This quarter has been eye-opening, deepening my understanding of the systems behind OY4C's work. Looking ahead, I am excited to actively strengthen our operations for scale and to experience how our impact shapes communities, public attitudes and leadership within new spaces."

Caitlin McLean, Director of Operations (Since Nov 2025)

Founder Comments

2025 was the year we shifted from ***momentum to impact***. What began as a group of young people filling a gap in our own education has grown into a network reshaping how climate learning is delivered globally.

2026 will be a defining year. With CCiC scaling internationally, a strengthened leadership team, and growing demand from schools around the world, we have the opportunity, and responsibility, to continue reaching a generation.

Our vision is simple: **climate education for every young person**. But achieving this requires all of us. I am endlessly grateful to our volunteers, partners, teachers, donors, and students who make this work real. Together, we are building the world young people deserve:

Education for Youth. By Youth. Together for the Climate.
